

Please keep K-LOVE 'on the air' on their current and future available frequencies. K-Love provides my family a positive listening experience. While bringing up preteen daughters in a world where people are allowed to glorify violence and human violations in music, I am grateful for K-LOVE's loving and kind format as an alternative choice for our family and community. K-LOVE provides news reporting, music and positive messages that help maintain a loving relationship with others. I believe that the local community should have the freedom of choice to listen to K-LOVE since their format is to help each of us continue to build a supportive community that builds people up instead of tearing people down. K-LOVE benefits the community by getting people to think beyond their own selfishness to extend help and support to others in the community, which helps reduce violence and crime. Please, FCC, do your part in support of a positive, caring community by keeping K-LOVE 'on the air'.
